

LIFE IS TOO SHORT TO MISS A SINGLE MOMENT.

See it all with
PanOptix® Pro.
Life. Uninterrupted.

Clareon® PanOptix® Pro

Trifocal IOL &
Trifocal Toric IOL

Alcon

SEE WHAT YOU'RE MISSING.¹⁻⁴

Cataracts don't just cloud your vision — they cloud your life.⁵

Big moments, small moments, joyful ones and everyday wonders...

they all begin to blur.

Cataracts are a natural part of aging, affecting most people by 65.⁶

As your vision fades, so can the vividness, connection, and clarity that makes life feel full.⁷

Don't miss out on the richness and beauty of life.

A simple procedure can change everything.⁴

With PanOptix® Pro replacement lenses, you'll see all of life as it should be seen: with clear, uninterrupted vision that's crisper and sharper at any distance.^{1,8,9*}

You can even reduce your need for glasses.^{2,10}

SEE BRIGHT, VIVID COLORS³

CLEAR, UNINTERRUPTED VISION^{8,9,11†}

RELY LESS ON EYEGASSES^{2,10}

Why let another moment pass you by?

DON'T MISS ANOTHER BEAUTIFUL MOMENT WITH PANOPTIX® PRO

Unlike traditional monofocal lenses that only allow you to see clearly at distance, PanOptix® Pro allows you to see it all.^{9,11}

Get lost in a book

SEE CLEARLY UP CLOSE^{1,10}

Reach for the shot

SEE CLEARLY IN BETWEEN^{1,10}

Hit the road

SEE CLEARLY FAR AWAY^{1,10}

PEOPLE LOVE PANOPTIX®

In a clinical study, 129 patients were asked about their experience with the PanOptix® lens.^{10‡}

99.2%

of patients with the PanOptix® lens would choose the same lens again.^{10§}

98%

of patients with the PanOptix® lens would recommend it to family and friends.^{10¶}

MORE THAN

9/10

PanOptix® IOL patients reported NEVER needing glasses at all distances.^{2#}

ASK YOUR EYE CARE PROFESSIONAL IF PANOPTIX® PRO IS RIGHT FOR YOU

Clareon® PanOptix® Pro. Uninterrupted vision at any distance.^{1†}

^{*} Based on a meta-analysis of 13 studies with a total of more than 600 patients.
[†] Compared to Clareon® PanOptix® based on bench and vision simulator studies.
[‡] Study conducted on AcrySof® PanOptix® patients. AcrySof® PanOptix® and Clareon® PanOptix® are optically equivalent. Response to the following question on IOLSAT questionnaire at 6 months post-op: "Given your vision today, if you had to do it all over, would you have the same lenses implanted again?"
[§] Response to the following question on IOLSAT questionnaire (Version 1.0, December 20, 2018) at 6 months post-op: "Given your vision today, if you had to do it all over, would you have the same lenses implanted again?"; n=127.
[¶] Response to the following question on IOLSAT questionnaire at 6 months post-op: "Given your vision today, would you recommend the lenses you had implanted to your family or friends?"; n=127.

CLAREON® PANOPTIX® PRO FAMILY OF TRIFOCAL IOLS

IMPORTANT PRODUCT INFORMATION:

CAUTION: Restricted by law to sale by or on the order of a physician.

DESCRIPTION: The **Clareon® PanOptix® Pro Trifocal IOL** is a type of multifocal IOL used to focus images clearly onto the back of your eye (retina) to allow clear vision after the cataract removal. In addition, the center of the **Clareon® PanOptix® Pro Trifocal IOL** allows for better near (reading) vision and intermediate (computer work) vision versus what a monofocal lens would provide. The **Clareon® PanOptix® Pro Trifocal Toric IOLs** are also designed to correct pre-existing corneal astigmatism, which is the inability of the eye to focus clearly at any distance because of difference curvatures on the cornea.

There is a chance that you still may need glasses for distance, intermediate, and/or near vision. You will get the full benefit of the **Clareon® PanOptix® Pro Trifocal IOL** when it is placed in both eyes. Please discuss with your eye doctor whether this is the right IOL for you.

Potential Side Effects: Due to the design of multifocal IOLs, there are some side effects that can be associated with the **Clareon® PanOptix® Pro Trifocal IOL** models. These may be worse than with a monofocal IOL, including visual disturbances such as glare, rings around lights, starbursts (rays around light sources), and reduced contrast sensitivity (decrease in ability to distinguish objects from their background, especially in dim lighting). These side effects may make it more difficult to see while driving at night or completing tasks in low lighting conditions such as at night or in fog, or in a dimly lit room after surgery as compared to before surgery.

Further, a toric IOL corrects astigmatism only when it is placed in the correct position in the eye. There is a possibility that the toric IOL could be placed incorrectly or could move within the eye. If the toric lens is not positioned correctly following surgery, the change in your astigmatism correction by the IOL, along with any necessary correction with glasses, may cause visual distortions. If the lens rotates in your eye, you may need additional surgery to reposition or replace the IOL.

ATTENTION: As with any surgical procedure, there are risks involved. Prior to surgery, ask your eye doctor to provide you with the Patient Information Brochure for the proposed IOL to be implanted. This document will further inform you of the risks and benefits associated with this IOL. Discuss any questions about possible risks and benefits with your eye doctor, as well as your medical condition and any eye disease you may have.
